LIST OF COMMODITY LINES

A complete list of the commodity lines, for which data are shown separately in the following tables, is shown below. The numbers on the left indicate the order in which the commodity lines are arranged under each kind of business or geographic division. Absence of a commodity line under a kind of business or geographic division indicates that the commodity line is not usually sold by establishments in that trade or division, and the amount, if any, was too small to be shown separately. Commodity descriptions, as given in the tables, are somewhat abbreviated because of space limitations.

* Percent of sales of all establishments accounted for by stations and terminals returning gallonage information.

x Insufficient analysis of gallonage sales to show separately.

v Withheld to avoid disclosure.

¹ Includes commodities other than petroleum products.

² Included under heading "Light heating oils."

³ Includes: a, kerosene, range oil, No. 1 fuel oil; b, Light heating oils; and c, Light Diesel type fuel oil.

⁴ Located in Idaho, Montana, and Wyoming.

⁵ Classified as urban under special rule.

APPENDIX A

THE CENSUS ACT OF JUNE 19, 1948

(PUBLIC LAW 671--80TH CONGRESS)

(CHAPTER 502--2D SESSION)

(S.554)

AN ACT

To provide for the collection and publication of statistical information by the Bureau of the Census.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Director of the Bureau of the Census, hereinafter referred to as the Director and the Bureau, respectively, is authorized and directed to take, compile, and publish the censuses of manufacturers, of mineral industries, and of other businesses, including the distributive trades, service establishments, and transportation (exclusive of means of transportation for which statistics are required by law to be filed with a designated regulatory body), in the year 1949 and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof: Provided, That the census of manufacturers shall not be taken in 1949. The censuses herein provided for shall include the United States and its Territories and such possessions as may be determined by the Director with the approval of the Secretary of Commerce.

(b) That the Director is further authorized to make such surveys as are deemed necessary to furnish annual and other interim current data on the subjects covered by the censuses provided for in this and other Acts.

Sec. 2. That the following sections of the Act of June 18, 1929 (46 Stat. 21), shall apply to the censuses and surveys authorized by this Act: Section 3, as amended by section 404 of Reorganization Plan Numbered II (53 Stat. 1436), and sections 5, 7, 8, 9, 10, 11, 12, and 15, except that the Director may also authorize the expenditure of necessary sums for travel expenses for attendance at training courses held by the Bureau: Provided, That in connection with any survey conducted by the Director pursuant to

section 1 (b) of this Act, the provisions of sections 9 and 10 of the Act of June 18, 1929 (46 Stat. 21), with respect to the answering of questions and furnishing of information, shall apply only to such inquiries as are within the scope of the schedules and of the type and character heretofore used in connection with the taking of complete censuses under the Act of June 18, 1929 (46 Stat. 21), or in connection with any censuses hereafter taken pursuant to section 1 (a) of this Act and the Act of June 18, 1929: Provided further, (a) That sections 9 and 10 of the Act of June 18, 1929 (46 Stat. 21), shall apply to surveys conducted pursuant to section 1 (b) of this Act only after publication of a determination with reasons therefor certified by the Director with the approval of the Secretary of Commerce that the information called for is needed to aid or permit the efficient performance of essential governmental functions or services; or has significant application to the needs of the public, business, or industry and is not publicly available from nongovernmental or other governmental sources; (b) that in the case of any new survey said sections 9 and 10 shall apply only after public notice, given by the Director at least thirty days in advance of requesting a return, that such survey is under consideration; (c) that the provisions of said sections 9 and 10 shall not apply to any survey more frequent than annual conducted pursuant to section 1 (b) of this Act; and (d) that the provisions for imprisonment provided by said sections 9 and 10 shall not apply in connection with any survey conducted pursuant to section 1 (b) of this Act.

Sec. 3. That inquiries, and the number, form, and subdivisions thereof for the censuses and surveys provided for in this Act, shall be determined by the Director, with the approval of the Secretary of Commerce. To the extent that the provisions of this Act conflict with the provisions of any other Act, pertaining to the Bureau of the Census, the provisions of this Act shall control: Provided, That nothing herein shall be deemed to revoke or impair the authority of any other Federal agency with respect to the collection or release of information.

Approved June 19, 1948.

APPENDIX B

TYPE-OF-OPERATION DESCRIPTIONS

Each wholesale establishment is classified, for Census purposes, on two bases, first, by type of operation--as merchant wholesaler, manufacturers' sales branch or office, petroleum bulk station, agent or broker, assembler--on the basis of the character of the business or the nature of functions performed; and second, by kind of business or trade--as drugs, dry goods, hardware, groceries, construction materials, etc., primarily on the basis of commodity lines sold. Establishments whose operations overlap types of operation or kinds of business are classified according to their major activity during the census year and all of the business is included in the one classification.

Wholesale establishments are divided into five major type-of-operation classifications, each of which is further subdivided with the result that data are presented for a total of 36 different types of operation.

Type-of-operation groups and their subdivisions are outlined below:

- I. Merchant wholesalers
 - Service wholesalers (domestic market)
 - Wholesale merchants, jobbers
 - Converters (textile)
 - Industrial distributors
 - Service wholesalers (foreign trade merchants)
 - Exporters
 - Importers
 - Limited-function wholesalers
 - Cash-carry wholesalers
 - Drop or direct-mill shippers
 - Wagon, truck distributors
 - Retailer-cooperative warehouses
- II. Manufacturers' sales branches, sales offices
 - Sales branches (with stocks)
 - Sales offices (without stocks)
- III. Petroleum bulk stations, terminals
 - Bulk stations
 - Independent bulk stations
 - Commission stations
 - Salary stations
 - Cooperative bulk stations
 - Distributing terminals
- IV. Agents, brokers
 - Auction companies
 - Brokers (merchandise):
 - Representing sellers
 - Representing buyers
 - Commission merchants
 - Export agents
 - Import agents
 - Manufacturers' agents:
 - With stocks
 - Without stocks
 - Selling agents
 - Purchasing agents, resident buyers
 - Cooperative buying agencies
 - Cooperative sales agencies
- V. Assemblers (mainly farm products)
 - Assemblers (dealing on own account)
 - Commission buyers
 - Cooperative marketing associations
 - Cream stations
 - Country grain elevators:
 - Independent
 - Line
 - Cooperative
 - Packers, shippers

Types of Operation Described

I. Merchant wholesalers

This major group, which in the 1939 Business Census was known as "Service and limited-function wholesalers," con-

sists of establishments usually known as wholesalers, distributors, jobbers, supply houses, etc. They are primarily engaged in buying, taking title to, and where customary, physically storing and handling goods, and selling the goods at wholesale principally to retailers, to industrial and commercial users, and to other wholesalers. Establishments in this group may perform operations on the goods incidental to the wholesale trading and delivery, such as installing machinery, equipment, and fixtures. Separately incorporated sales subsidiaries of manufacturing and mining companies, buying and selling merchandise on their own account, are included in this major group.

Service wholesalers (domestic market):

Wholesale merchants, jobbers.--Merchant wholesalers primarily engaged in buying and selling in the domestic market, who perform all of the principal wholesale functions. They sell goods principally to retailers or to industrial, commercial, or professional users; buy and sell merchandise on their own account; carry stocks; assemble in large lots and redistribute in smaller quantities usually through salesmen; extend credit to customers; make deliveries; and render advice to the trade.

Converters (textile).--Included here are those special types of merchants in the textile trade that purchase textiles in the gray from mills or manufacturers, have them dyed and finished, usually on a contract or commission basis, and sell to the cutting-up trade, garment makers, wholesalers, or large-scale retailers. Plants engaged in finishing, dyeing, printing, etc., are included in the Census of Manufactures.

Industrial distributors.--Included here are establishments dealing in a fairly complete line of materials, equipment, and supplies for mines, factories, oil wells, public utilities, or similar industries, and selling primarily to industrial users. Establishments primarily engaged in selling machinery are included under "Wholesale merchants."

Service wholesalers (foreign trade merchants):

Exporters.--Merchant wholesalers that are primarily engaged in selling in the foreign rather than the domestic market.

Importers.--Merchant wholesalers whose chief distinction lies in the source of their purchases which is primarily foreign.

Limited function wholesalers:

Cash-carry wholesalers.--Establishments that generally carry only a limited line of products, mostly staples and fast moving items, and usually do not extend credit to their customers nor make deliveries. Retailer-cooperative warehouses and voluntary group grocery wholesalers selling on a cash-and-carry basis are included in their respective classifications and not here. Cash-and-carry depots owned by service wholesalers and operated as separate establishments are included here.

Drop or direct-mill shippers.--Merchants primarily engaged in filling orders by having shipment made directly from the manufacturer or other source of supply to the drop-shippers' customer. As drop shippers they do not perform warehouse, storage, or delivery functions.

Wagon, truck distributors.--Merchant wholesalers that are distinguished by the following characteristics: (1) They combine the functions of salesmen with those of deliverymen. Usually no separate sales force is employed, the work of selling and delivering being carried out by salesmen-drivers. (2) They normally carry a limited assortment of merchandise consisting of nationally advertised fast moving items of a perishable or semiperishable nature. (3) Their practice is to sell for cash and in the original package.

It should be noted that only those wagon distributors with recognizable places of business, or who have paid employees, are included in the census.

Retailer-cooperative warehouses.--Establishments owned and operated cooperatively by groups of independent retailers buying collectively. The establishment functions as a separate wholesale house selling chiefly to members. Informal buying groups or clubs without warehousing facilities and having no paid employees were not enumerated in the census. Cooperative buying organizations with established places of business and purchasing for others on a commission basis are classified as "Cooperative buying agencies" and are included under "Agents and brokers."

II. Manufacturers' sales branches, offices

Establishments maintained apart from manufacturing plants by manufacturing and mining companies primarily for selling or marketing their products at wholesale. Branch stores selling to household consumers or individual users are classified in Retail Trade. Sales branches or offices located at manufacturing plants or at general administrative offices of manufacturers are excluded unless operated as separate and distinct businesses. Separately incorporated subsidiaries of manufacturing and mining companies identified with parent company and selling its products only are included, whereas these establishments are classified as "Merchant wholesalers" in the Standard Industrial Classification Manual.

Manufacturers' sales branches (with stocks).--Are distinguished from sales offices by the fact that the former maintain facilities for the physical storage, handling, and delivering of at least a portion of the merchandise sold. Sales branches frequently install machinery, equipment, and apparatus sold by them and sometimes are engaged in leasing or renting machinery or equipment on a royalty basis.

Manufacturers' sales offices (without stocks).--Are distinguished from manufacturers' sales branches by the fact that sales offices do not maintain facilities for the physical storage, handling, and delivery of merchandise.

III. Petroleum bulk stations, terminals

Distinguished primarily by their physical properties for transferring, storing, and distributing gasoline, fuel oil, and other bulk petroleum products at wholesale. Distributors selling packaged, rather than bulk, petroleum goods and those without stationary storage facilities who sell in bulk from tank trucks are classified as merchant wholesalers, not as bulk stations.

In addition to types of operation mentioned below, petroleum bulk stations and terminals are also classified (in tables 14C and 14F) on the basis of ownership as "Refiner-marketer" and "Other."

Bulk stations.--Maintain storage facilities on railroad or other transportation lines and sell, usually from trucks, to gasoline service stations and other retailers; to commercial and industrial users; and, in agricultural areas, to farmers. As a rule they do not have drive-in facilities for the accommodation of automobiles. Stations set up in a manner to service automobiles are classified in Retail Trade. Stations conducting both wholesale and retail businesses are classified according to their major activity during the Census year.

Bulk stations are classified on the basis of type or character of operation as follows:

Independent bulk stations.--Owned and operated independent of any other bulk station. This classification includes any single-unit bulk stations operated under the same ownership with filling stations but not under the same ownership with other bulk stations.

Commission stations.--Owned by multiunit concerns (concerns operating more than one bulk station) but whose operators have a proprietary interest in the business. Operators of these stations are as a rule paid commissions which include unspecified amounts to cover overhead, delivery costs, and pay roll. Personnel are considered as employees of the operator, rather than of the owner of the bulk plant.

Salary stations.--Owned and operated by multiunit concerns, concerns operating more than one bulk plant. Personnel of salary stations are generally considered as employees of companies owning the plants.

Cooperative bulk stations.--Owned and operated by cooperative associations. Many sell primarily to farmers via tank trucks.

Distributing terminals.--Places of business located at water, pipe line, or other transportation terminal points with special equipment for the transfer of petroleum products from one type of transportation to another. Although many terminals are similar in their operation to bulk plants, they are generally distinguished by their location, their larger operations, the character of their facilities, and in the class of customers served. Terminals are largely engaged in selling to bulk stations and industrial accounts, although some sales are made to retailers. Bulk stations on the other hand are primarily engaged in selling to retailers and commercial accounts.

Only those terminals are included in Wholesale Trade that make a practice of selling petroleum products to other concerns. Facilities used solely in making intra-company transfers are not considered as separate establishments for the purpose of the Census of Business.

IV. Agents and brokers

Establishments, the operators of which are in business for themselves, negotiating for others sales or purchases of merchandise in domestic or foreign trade, but who do not, as a rule, take title to the merchandise. They may represent a single client or a group of clients, either buyers or sellers but not both in the same transaction, and compensation is usually in the form of commissions or brokerage. Sales as shown for agents and brokers represent the sales (or purchase) value of the goods in the transactions negotiated and include some approximation as many of them do not maintain records of the dollar sales. In such cases carefully prepared estimates are included.

In the agents and brokers field it is often difficult to distinguish the various detailed types of operation. This is particularly true of brokers, commission merchants, manufacturers' agents, and selling agents.

Auction companies.--Concerns that sell by the auction method at wholesale. Sales are conducted under definite rules and are usually made to the highest or best bidder. These establishments provide places for public inspection and sale of merchandise consigned to them. Auction selling is most common in the marketing of leaf tobacco, live-stock, fruits and vegetables, and other farm products. Auctioneers and so-called "community sales" are not included in Wholesale Trade.

Brokers (merchandise).--Negotiate transactions between buyers and sellers without having direct physical control of the goods and without taking title or assuming the risk of price fluctuations. They act as agents for their principals, who usually are producers or manufacturers. Although some brokers represent wholesalers or retailers, this latter is usually as a purchasing function. Their powers as to prices and terms of sale are usually limited by their principals.

Brokers often are not bound to any set of clients. Their relations with any one client may not be continuous. In addition to negotiating purchases or sales, their chief function consists of advising their clients as to market conditions. Normally, brokers do not handle the invoices.

In some trades it is difficult to distinguish brokers from selling agents and manufacturers' agents, the terms frequently being used to describe similar methods of operation. This is particularly true in the food industry where brokers almost exclusively represent producers (sellers). Brokers primarily engaged in representing buyers are distinguished in Census statistics from those representing sellers.

Commission merchants.--Handle commodities or merchandise consigned to them for sale on a commission basis. As commission merchants they do not take title to the goods they sell for their clients. They have considerable latitude in regard to price and terms of sale. When the goods require it, they maintain places of business suitable for the handling, conditioning, warehousing, and selling of merchandise. Only commission merchants selling principally on a consignment basis are included here, whereas those dealing principally on their own account but doing some consignment business are classified as merchant wholesalers.

This classification also includes factors who specialize in the raw cotton trade. Factors are located, as a rule, in central markets and receive the cotton on consignment from the producing areas. Their functions consist of advancing funds to shippers, who may be growers; warehousing and storing the goods; grading; and selling.

Export agents.--Includes commission houses, and agents and brokers who specialize in the purchase of goods for, or sale of goods to, foreign buyers.

Import agents.--Includes commission merchants, manufacturers' agents, and selling agents who represent foreign sellers in the domestic market. In addition to negotiating sales, they usually attend to customs formalities.

Manufacturers' agents.--Customarily sell part of the output of certain manufacturers, usually two or more whose goods are noncompeting, on an extended contractual basis. They usually are limited with respect to sales territory, prices, and terms of sale. Their principal duty is selling, although some of them warehouse goods for their principals.

A segregation is made, for Census purposes, between those manufacturers' agents who own stocks and those who do not.

Selling agents.--Are independent operators whose principal function is to sell the entire output of a given line of goods for one or more manufacturers with whom they maintain continuous contractual relationships. Selling agents differ from manufacturers' agents in the following respects: (1) They normally sell all of the output of one or more products of the clients they serve; (2) they are less limited in sales territory; (3) they have considerable latitude with regard to prices, terms of sale, etc., whereas the authority of the manufacturers' agent is limited; and, (4) they frequently finance their clients and offer assistance in connection with the advertising and other sales-promotion activities.

Purchasing agents, resident buyers.--Purchasing agents, sometimes referred to as syndicate buyers, are independent operators buying merchandise for their clients. They are to be distinguished from manufacturers' purchasing agents who are not in business for themselves but work for a single employer. Frequently they combine orders from a number of relatively small manufacturers, wholesalers or retailers, and buy on a larger scale than would be possible for the individual concerns whom they represent.

Resident buyers are purchasing agents operating primarily in the dry goods trade. They are located in central markets and are in close contact with manufacturers in these markets and with wholesalers and retailers at outlying points. Normally they represent the interests of buyers although they may also occasionally represent sellers. Purchasing agents and resident buyers maintain more continuous relationship with clients than is the case with buying brokers.

Cooperative buying agencies.--Buying agencies maintained cooperatively by a group of purchasers with common interests.

Cooperative sales agencies.--Include both the sales agencies and the central marketing associations set up by cooperatives to facilitate the sale of the products of the members.

V. Assemblers (mainly farm products)

Consists of establishments primarily engaged in purchasing and assembling farm products and sea foods in local

growers' markets, at local producing points, or in the cities of producing regions. They assemble farm products, produced on a relatively small scale, in lots for shipment to other wholesale buyers. In addition to buying and wholesale distribution of farm products, they frequently grade, pack, and store the commodities handled.

Assemblers (dealing on own account).--Are distinguished by the fact that they are independent buyers who deal on their own account. Some maintain offices at a central point and have a group, line, or chain of buying stations.

Quantities of agricultural commodities may be purchased locally by retail, service, or other business or industrial establishments and sold or used for productive purposes. Such establishments are not included here since classification for Census purposes is based on primary activities during the Census year.

Commission buyers.--Assemblers that are distinguished by the fact that they are engaged as agents in the buying of agricultural products, rather than dealing on their own account.

Cooperative marketing associations.--Are cooperative associations formed largely by farmers primarily for the purpose of disposing of their products. They frequently also buy for their members various supplies such as feed, seed, fertilizer, and fuel.

The term "cooperative marketing association" includes local cooperatives--both those disposing of their products direct and those marketing through a central association or agency. Cooperative cream stations and cooperative elevators are covered under their respective designations and not here. Farmers' cooperatives engaged primarily in buying supplies for members are included in Retail Trade.

Cream stations.--Include buying stations, located in milk producing regions, that buy fluid cream from farmers. They may be maintained by creamery companies, by cooperative associations, or by independent firms. Cream stations operated in conjunction with, and secondary to, other businesses such as retail stores, service establishments, elevators, etc., are not included here.

Country grain elevators.--Include independent, line, and cooperative concerns which purchase and handle grain and have properties commonly referred to as "elevators." Business concerns in producing areas, buying and selling grain, who do not have "elevators" are included under "assemblers (dealing on own account)" or "commission buyers," depending on how they operate. Terminal elevators in central markets engaged primarily in selling grain are considered, for Census purposes, as merchant wholesalers.

Independent elevators.--Are, for Census purposes, limited to a single elevator under one ownership.

Line elevators.--Are two or more elevators (other than cooperatives) under one ownership. Two or more elevators operated by a cooperative association are included under cooperative elevators. Many line elevators are owned by milling concerns which buy grain for their own use; or by merchandising concerns which purchase the grain through the elevators but which sell only from central points. For elevators performing the buying but not the selling function, "sales," as reported to the Census, represent the value of the grain purchased.

Cooperative elevators.--Are owned and operated cooperatively by farmers. No distinction is made between single and multiple elevators operated by cooperative associations.

Packers and shippers.--Production-point assemblers, packing, shipping and selling fruits, vegetables, or sea foods. Operators who do some growing but who perform primarily a commercial business for other producers are included. Excluded from the Census of Business are packing houses operated as integral parts of farms, and contract packers performing no selling functions. Commercial and cooperative houses packing and shipping sea foods are included here, but those maintained by fishermen for packing and marketing their own catch are excluded.

APPENDIX C

KIND-OF-BUSINESS DESCRIPTIONS

Each wholesale establishment was assigned a kind-of-business classification. In general, the kind-of-business classification assigned was based on the analysis which each establishment reported of its total sales classified into individual commodity lines. As lines handled by a single wholesale establishment frequently are quite broad and may overlap classifications--e.g., tobacco and confectionery, groceries and wines and liquors, hardware and automotive supplies--kind-of-business classification is determined by the predominant activity as shown by the commodity line sales analysis, and all of the business of the establishment is included in the one classification. For some kinds of business, such as mill supply, industrial supply, heating and plumbing, and school supply businesses, usual trade designations, rather than predominant merchandise lines, determine classification.

The kind-of-business classification of each warehouse, administrative office, and auxiliary unit is based on the classification of the wholesale establishments in the parent organization which it services or to which it is auxiliary.

Wholesale establishments are classified into 145 kinds of business. These 145 detailed classifications are grouped into 53 trade classifications which are further arranged according to 17 major groups.

KIND-OF-BUSINESS DESCRIPTIONS

I. Groceries, confectionery, meats

1.--Groceries (general line)--Wholesale establishments handling a general line of dry groceries and processed foods usually sold in retail grocery stores, such as canned foods, flour, sugar, coffee, tea, spices, as well as nonfood grocery items, including matches, household chemicals, soap powders, paper products, brooms, brushes, etc. Establishments are included in this group primarily on the basis of the usual trade designation rather than the more strict interpretation based on the commodities handled. This classification includes five general types of establishments:

Not sponsoring cooperative or voluntary groups--Wholesale establishments (except cash-and-carry depots and institutional wholesalers) not sponsoring or affiliated with voluntary or cooperative groups.

Voluntary group wholesalers--Wholesale establishments sponsoring or affiliated with sponsors of voluntary organizations of independent retailers performing joint advertising or other sales promotion activities. All wholesalers sponsoring such groups are included regardless of the portion of their sales to retail members of the organization.

Retail-cooperative warehouses--Wholesale establishments owned and operated cooperatively by groups of independent retailers buying collectively. Establishments function as incorporated wholesale companies selling chiefly to members but sometimes doing a regular wholesale business.

Cash-and-carry depots--Wholesale establishments who extend little or no credit and usually do not make deliveries. They generally warehouse limited stocks of canned foods, staples, and other fast moving items.

Institutional wholesalers--Wholesale establishments selling a general line of foods primarily to hotels, restaurants, cafeterias, and similar types of commercial users.

2.--Confectionery--Wholesale establishments primarily engaged in selling candy, chewing gum, popcorn, potato chips, salted nuts, fountain fruits and syrups, and similar confections. Cigars, cigarettes, and other tobacco products are also frequently handled.

3.--Fish, sea foods--Wholesale establishments primarily engaged in selling fresh and cured fish, crustacea, and mollusks. Establishments engaged in buying, cleaning or shucking, shipping and selling fish, crustacea, and mollusks are also included.

4.--Meats, meat products--Wholesale establishments primarily engaged in selling fresh, frozen, cured or processed (but not canned) meats, lard, and other edible meat products. Secondary lines such as butter, cheese, eggs, dressed poultry, vegetable shortening, canned meats, etc., are frequently handled.

5.--Other grocery, food specialties:

Canned foods--Wholesale establishments primarily engaged in selling canned and bottled foods, such as fruits, juices, vegetables, meats, fish, milk, and the like.

Coffee, tea, spices--Wholesale establishments primarily engaged in selling coffee (green or roasted), tea, and spices. Establishments primarily engaged in roasting and grinding coffee, blending tea, or grinding and packaging spices are not included in Wholesale Trade.

Dried fruits, nuts--Wholesale establishments primarily engaged in selling dried fruits and nuts.

Flour--Wholesale establishments primarily engaged in selling flour, including prepared and packaged flour. Prepared foods and breakfast cereals are frequently handled.

Frosted, frozen foods--Wholesale establishments primarily engaged in selling quick frozen foods, such as frozen fruits, vegetables, and sea foods.

Miscellaneous grocery specialties--This classification includes two general types of wholesale establishments: (a) those handling a combination of grocery items, no one item predominating, but not a sufficiently broad line of commodities to be classified as "general line"; and (b) those primarily engaged in selling specialized lines of grocery and food specialties such as bakery products, packaged breakfast cereals, cocoa, sugar, table salt, yeast, oleomargarine, household soaps, and soap powders, starch, cooking oils and shortening, matches, soft drinks, and the like.

II. Farm products (edible)

6.--Dairy, poultry products--Wholesale establishments primarily engaged in selling (or buying, as in the case of assemblers) one or a combination of lines of dairy and poultry products such as fluid milk, cream, cheese, butter, ice cream, live or dressed poultry, eggs, and related products. Pasteurizing and bottling operations incidental to the wholesale distribution of milk and cream are included in this classification. Establishments engaged chiefly in distributing milk and other dairy products by daily delivery to homes are classified in the Retail Census.

7.--Fruits, vegetables (fresh)--Wholesale establishments primarily engaged in selling (or buying) fresh fruits, vegetables, berries, melons, and the like.

III. Beer, wines, distilled spirits

8.--Beer, ale--Wholesale establishments primarily engaged in selling beer, ale, porter, stout, and other fermented malt liquors. Soft drinks, confectionery, tobacco, wines, and spirits are frequently handled as secondary lines.

9.--Wines, distilled spirits--Wholesale establishments primarily engaged in selling wines, whiskey, gin, rum, brandy, and other distilled alcoholic beverages. Establishments which bottle and sell wines and distilled spirits manufactured in bulk by others, liquor departments of drug wholesalers, and State-operated wholesale outlets are included. State depots supplying State liquor stores are not included in Wholesale Trade but are included in Retail Trade.

IV. Drugs, chemicals, allied products

10.--Drugs (general line).--Wholesale establishments engaged in selling a full line of drugs and drug sundries, including pharmaceuticals, proprietary medicines, druggists' rubber goods, cosmetics, toiletries, novelties, and related merchandise. Cooperatives and voluntary group wholesalers handling a full line of drugs are also included in this classification. Liquor departments of drug wholesalers, however, were reported as separate establishments and are included with "Wines and distilled spirits" under Group III.

11.--Drugs, drug sundries (specialty lines):

Proprietary medicines, toiletries.--Wholesale establishments primarily engaged in selling proprietary medicines, toilet preparations, and articles such as perfumes, cosmetics, powders, shaving preparations, toilet soap, dentifrices, combs, brushes, mirrors, and related items.

Retailer cooperatives-specialty lines.--Wholesale establishments owned and operated cooperatively by groups of independent drug stores buying collectively. Establishments function as incorporated wholesale companies selling chiefly to members a limited line of such items as drugs, proprietary medicines, toilet articles and preparations, sick room supplies, sanitary supplies, and related drug sundries.

Drug sundries.--Wholesale establishments primarily engaged in selling a limited line of such items as medical glass, rubber goods, bandages, antiseptics, drugs, and other medicine cabinet and sick room supplies or related products. See also "Surgical, medical, hospital equipment and supplies" under Group XIV.

12.--Industrial chemicals.--Wholesale establishments primarily engaged in selling one or a combination of such industrial and heavy chemicals as coal-tar chemicals, plastics, compressed and liquefied gases, acids, ammonia, soda, industrial alcohols, explosives, dyestuffs, naval stores, and other heavy chemicals. Concerns engaged primarily in selling fireworks and ammunition for small arms are included in "Amusement, sporting goods" under Group XVII.

13.--Paints, varnishes:

Paints, with glass, wallpaper.--Wholesale establishments primarily engaged in selling paints, varnishes, lacquers, enamels, calcimines, shellac, stains, etc., but also selling substantial amounts of glass and/or wallpaper. Painters' supplies, oils, chemicals, and related products are frequently handled.

Paints, without glass, wallpaper.--Wholesale establishments primarily engaged in selling paints, varnishes, lacquers, enamels, calcimines, shellac, stains, etc. Painters' supplies, oils, chemicals, and related products are frequently handled.

V. Tobacco and products (except leaf)

14.--Tobacco and products (except leaf).--Wholesale establishments primarily engaged in selling manufactured tobacco products such as cigars, cigarettes, chewing and smoking tobacco, and snuff. Confectionery, smokers' articles, razor blades, playing cards, etc., are frequently handled.

VI. Dry goods apparel15.--Clothing, furnishings, footwear:

Clothing, furnishings, (general line).--Wholesale establishments engaged in selling diversified lines of apparel and furnishings, such as men's and boys' clothing and furnishings, women's and children's clothing and accessories, millinery, and shoes.

Men's, boys' clothing, furnishings.--Wholesale establishments primarily engaged in selling men's and boys' suits, coats, overcoats, work clothing, hats and caps, shirts, ties, underwear, and other furnishings except shoes.

Women's, children's clothing, furnishings.--Wholesale establishments primarily engaged in selling women's and children's coats (except fur), suits, dresses, skirts, and

other outerwear; infants' and children's wear; and miscellaneous furnishings and accessories except shoes.

Furs (dressed), fur clothing.--Wholesale establishments primarily engaged in selling dressed furs, fur clothing, and fur cuttings.

Millinery, millinery supplies.--Wholesale establishments primarily engaged in selling women's hats and other millinery, millinery trimmings, and millinery supplies.

Shoes, other footwear.--Wholesale establishments primarily engaged in selling men's, boys', women's, children's, and infants' footwear of leather, rubber, and other materials.

Work clothing.--Wholesale establishments primarily engaged in selling overalls, work shirts, work pants, jackets, industrial garments, work gloves, and caps. Establishments engaged primarily in selling work shoes are classified under "Shoes, other footwear."

16.--Dry goods (general line).--Wholesale establishments engaged in selling a diversified combination of lines usually sold in retail dry goods and general merchandise stores, including piece goods, home furnishings, notions, and hosiery. Men's and women's clothing, furnishings, and millinery frequently constitute secondary lines. Establishments are included in this group on the basis of usual trade designation rather than the more strict interpretation of the commodities handled.

17.--Dry goods specialties, piece goods, notions:

Hosiery, underwear.--Wholesale establishments primarily engaged in selling women's hosiery, underwear, corsets, and allied garments.

Piece goods.--Wholesale establishments primarily engaged in selling textiles in the piece or bolt.

Other dry goods, notions.--Wholesale establishments primarily engaged in selling miscellaneous items such as smallwares, miscellaneous knit and lace goods, fancy linen and needlework, cloth labels, etc., and notions, including sewing thread, tapes, needles, pins, buttons, hair accessories, zippers, shoe laces, etc.

18.--Piece goods converters.--Wholesale establishments who purchase textiles in the gray or unfinished form, have them dyed and/or finished by others, usually on a contract basis, and sell to garment makers, wholesalers, or retailers. Converting plants engaged in the bleaching, dyeing, finishing, printing, etc., are included in the Census of Manufactures.

VII. Furniture, home furnishings19.--Furniture (household, office):

Household furniture.--Wholesale establishments primarily engaged in selling living room, bedroom, dining room, kitchen, porch, garden, hall, and juvenile furniture made of wood, metal, reed, rattan, willow, or fiber.

Office furniture.--Wholesale establishments primarily engaged in selling wood, metal, or fiber office furniture, such as chairs, desks, tables, filing cabinets and bookcases, etc. Establishments primarily selling office machines and equipment are classified as "Office machines, equipment" and those primarily selling store fixtures as "Store machines, fixtures," under Group XIV.

20.--Home furnishings, floor coverings:

China, glassware, crockery.--Wholesale establishments primarily engaged in selling table and household china, glassware, and earthenware. Establishments specializing in selling restaurant or hotel china and glassware are classified as "Restaurant, hotel supplies (principally nonfood)" under Group XIV.

Floor coverings.--Wholesale establishments primarily engaged in selling carpets, rugs, linoleums, and other floor coverings.

Antiques.--Wholesale establishments primarily engaged in selling antique furniture, home furnishings, and objects of art. Reproductions of period furniture are classified as household furniture, and establishments primarily engaged in furniture restoration and repair are included in Service Trade.

Miscellaneous home furnishings--Wholesale establishments primarily engaged in selling a specialized line of home furnishings, such as brooms, brushes, curtains, draperies, pictures and picture frames, window shades, kitchen utensils, phonograph records, musical instruments, and similar types of furnishings for the home.

VIII. Paper and its products

21.--Wrapping paper, twine--Wholesale establishments primarily engaged in selling wrapping and other coarse paper (not designed for printing) and wrapping twine.

22.--Fine paper--Wholesale establishments primarily engaged in selling writing papers, reproduction paper stock, cover, text, thin, and other fine papers.

23.--Stationery, office supplies--Wholesale establishments primarily engaged in selling commercial and social stationery including envelopes, typewriter and mimeograph paper in cut sizes, file cards and folders; and office supplies such as pens, pencils, writing inks, carbon paper, typewriter ribbons, greeting cards, erasers, calendars, paper clips, and similar office supplies.

24.--Wallpaper--Wholesale establishments primarily engaged in selling embossed and printed wallpaper for use in covering or decorating interior walls and ceilings. Paints and varnishes are frequently handled.

25.--Miscellaneous paper products--Wholesale establishments primarily engaged in selling newsprint, groundwood, book paper, paperboard, cellophane, and converted paper products such as bags, boxes, cups, dishes, towels, napkins, tissues, and bottle caps, etc. Establishments selling a combination of lines of paper and its products, no one line predominating, are also included here.

IX. Farm products (raw materials)

26.--Farm products (raw materials):

Cotton--Wholesale establishments primarily engaged in selling (or buying) raw cotton and cotton linters. This classification does not include establishments engaged principally in ginning or compressing raw cotton.

Grain--Wholesale establishments primarily engaged in selling (or buying) corn, wheat, oats, rye, barley, and other grains.

Hides, skins, raw furs--Wholesale establishments primarily engaged in selling (or buying) untanned hides, skins, raw furs, such as cattle hides, sheep skins, goat skins, etc., and pelts of fur-bearing animals.

PRINCIPAL CENSUS TYPE-OF-OPERATION AND KIND-OF-BUSINESS CLASSIFICATIONS FOR 1948,
WITH STANDARD INDUSTRIAL CLASSIFICATION EQUIVALENTS

Wholesale trade as defined for Census purposes conforms with the field as outlined in Standard Industrial Classification (SIC) Manual, Volume II, Nonmanufacturing Industries, a manual published by the Executive Office of the President, Bureau of the Budget, May 1949. Census type-of-operation and kind-of-business classifications differ from those outlined in the SIC Manual primarily in that the former are in more detail. Census classifications together with their equivalents in the SIC Manual are shown below.

APPENDIX F

EXPLANATION OF TERMS

City size

Data are presented in table 8A by "City-Size," based on advance 1950 estimates of population of the places in which the establishments are located. Data are presented for nine groups, as follows:

Cities of 500,000 inhabitants or more
 Cities of 250,000 to 499,999 inhabitants
 Cities of 100,000 to 249,999 inhabitants
 Cities of 50,000 to 99,999 inhabitants
 Cities of 25,000 to 49,999 inhabitants
 Cities of 10,000 to 24,999 inhabitants
 Cities of 5,000 to 9,999 inhabitants
 Cities of 2,500 to 4,999 inhabitants
 Remainder of the United States

Commissions received

Represents earnings received by the reporting establishment during the year 1948 from sales made on an agency basis for the account of others. It does not include profits, if any, on sales for the account of the reporting establishment.

Commodity line

The term "commodity line," as used in this report, represents a group of related commodity items. Sometimes the group of items is broad enough to be referred to as a merchandise line. The groupings were established, for Census purposes, in consultation with representatives of suppliers of the information, and with users of census data. Consideration was given to the more common groupings of lines maintained by business establishments for sales record purposes as well as to needs for analytical information.

All commodity or merchandise items were grouped, for Census purposes, into 126 principal commodity lines. Fifty-eight of the principal or major lines were further subdivided into 274 detailed lines, giving a total of 400 classifications. It should be noted that retail sales of wholesale establishments are not separately shown, but are included along with wholesale sales in the commodity classifications. "Receipts from services and sources other than sale of merchandise" was considered as a commodity line (No. 126), hence the sum of all commodity-line sales items is equivalent to total sales.

Credit terms

Credit sales.--Include all sales during the year except those strictly on a cash or c.o.d. basis.

Establishments doing credit business.--Included under this heading are all merchant wholesalers and manufacturers' sales branches, except those indicating that all of their business was strictly on a cash or c.o.d. basis.

Credit sales as percent of all sales.--Includes all sales during the year 1948, except those strictly on a cash or c.o.d. basis, expressed as a percent of total sales of establishments reporting credit sales.

End-of-year accounts and notes receivable as percent of credit sales.--Represents the amount of outstanding accounts and notes receivable as of the end of the year 1948 expressed as a percent of credit sales. Includes only the accounts and notes receivable resulting from the sale of merchandise and held by the reporting establishments. Notes and accounts sold or discounted to banks, finance companies, or factors are not included even though sold "with recourse." These figures are based on data for establishments reporting credit sales, end-of-year receivables, and number of credit accounts.

Percent change in accounts and notes receivable, beginning to end of year 1948.--Represents the change in amount of accounts and notes receivable from the beginning to end of year 1948, expressed as percent of accounts and notes

receivable at the beginning of the year. These figures are based on establishments reporting both beginning and end-of-year receivables.

Bad debt losses as percent of credit sales.--Represents the amount of receivables written off during the Census year, expressed as percent of credit sales. Bad debt losses includes all receivables written off during 1948 as uncollectible, even though the credit may have been extended on sales made in 1947 or earlier. These figures are based on data for establishments reporting credit sales, end-of-year receivables, and number of credit accounts.

Credit accounts per establishment.--Represents average number of credit accounts as of December 31, 1948, per establishment doing credit business. These figures are derived by dividing the number of credit accounts by the number of establishments doing credit business.

Credit sales per account.--Represents average annual credit sales per credit account. Derived by dividing the total amount of credit sales for the year by the number of credit accounts.

Employment and pay roll terms

Pay roll.--Pay roll includes all compensation (salaries, wages, commissions, and bonuses) paid during the specified period to all employees. For corporations, it includes amounts paid to officers and executives; it does not include compensation for proprietors or firm members of unincorporated businesses. Pay roll is reported before deductions for Social Security, income tax withholding, insurance, dues, etc.

Pay roll--entire year.--All amounts paid during the census year to employees are included in this item.

Pay roll--specified workweeks.--All amounts paid to employees on pay rolls for the workweek ending nearest March 15, July 15, and November 15 are included in these items. Provision was made for reporting pay roll adjusted to the workweek where the pay period was on other than a workweek basis, and also for reporting on a workweek basis commission and bonus payments. However, for a number of establishments annual pay roll figures included amounts not allocated to weekly pay rolls.

Paid employees.--Paid employees consist of the number of employees including salaried officers and executives of corporations who were on the pay roll for the specified workweeks.

Employee size.--In tables 6A and 6B wholesale establishments are classified by employee-size groups, based on the total number of paid employees for the workweek ended nearest November 15, 1948. Data are presented for eleven employee-size groups, as follows:

100 or more employees	6 or 7 employees
50 to 99 employees	4 or 5 employees
20 to 49 employees	3 employees
10 to 19 employees	2 employees
8 or 9 employees	1 employee

No paid employees

Active proprietors of unincorporated businesses.--Active proprietors include owners or partners of unincorporated businesses who devoted the major portion of their time to the operation of the business during November 1948.

Establishments

Establishments consist of all wholesale places of business as well as administrative offices, central warehouses, and other units of multiunit organizations which service, or are auxiliary to, the wholesale establishments of the organization. The count represents the number of establishments in business at the end of 1948.

Administrative offices and auxiliary units.--These include locations of a multiunit organization which service, or are auxiliary to, the wholesale establishments within

the organization. They are not primarily engaged in selling merchandise. Included are such locations as district offices, purchasing offices, central warehouses, garages, etc., primarily engaged in performing administrative or other auxiliary functions. Chain-store warehouses and central warehouses which service the retail establishments of their own organization are classified in Retail Trade.

Wholesale establishments.--These are separate places of business primarily engaged in selling, or acting as an agent in selling merchandise to (or buying for) business concerns, regardless of whether the latter purchased for resale or for business use. The place of business may be a warehouse from which sales are made at wholesale, a sales or brokerage office, or part of an office that may be shared with others. Each establishment of organizations operating at more than one place of business is counted separately.

Although the 1948 Census of Business enumerated all wholesale establishments regardless of size, tabulations exclude data for those that operated during the entire year 1948 but had sales of less than \$5,000. In 1939 the corresponding figure for exclusion from the tabulations was \$500.

Expense terms

Operating expenses.--Total operating expenses, sometimes referred to as "overhead," includes all expenses incurred during the census year by the reporting establishment. It includes pay roll as well as other overhead expenses, but not the cost of merchandise sold, nor does it include withdrawals by owners of unincorporated businesses. For agents, brokers, and commission petroleum bulk stations the entries under the heading "operating expenses" represent the amount of brokerage or commissions received rather than overhead expenses incurred.

For establishments with total sales of \$200,000 or more, operating expenses are further classified into administrative, selling, delivery, warehouse, occupancy, and "other" expenses.

Administrative expenses.--Includes the general administrative expenses not chargeable directly to any one division or function. Included here are executives' and officers' salaries and expenses; office salaries; office supplies and stationery; postage; telephone and telegraph; professional services; depreciation on furniture and fixtures; dues, subscriptions, and donations; collection expenses; etc.

Selling expenses.--Includes direct expenses incurred in selling merchandise; covers such items as salesmen's salaries, commissions, and bonuses; salesmen's traveling expenses; advertising; and insurance and depreciation on salesmen's automobiles. Delivery expenses (as defined below) are shown separately.

Shipping, delivery expenses.--Includes costs incurred in transferring the merchandise from the warehouse or other place of storage to the customer; covers items such as deliverymen's salaries and wages, out-freight, express, parcel post, contract delivery, trucking, depreciation on trucks, etc.

Warehouse expenses.--The cost of operating the warehouse or stock room. Covers such items as salaries and wages of warehouse employees, boxing and packing costs, etc.

Occupancy expenses.--Includes all expenses arising from the use and maintenance of the premises and the buildings, fixtures and equipment; covers maintenance labor, heat, light, power and water. Where the premises are not owned, rent is included. For firms owning the premises it covers such items as building repairs and supplies, insurance and taxes on building, and depreciation on buildings. Because a number of firms experienced difficulty in differentiating between "warehouse" and "occupancy" expenses, data for these two items should be used with care.

Other expenses.--Included here are those operating expenses not classified above, such as interest on bank loans, losses from bad debts, etc.

Expense to sales ratios.--Operating expenses (including pay roll) expressed as a percent of sales.

Firm size

Data are presented in table 8B by "Firm Size," based on the number of wholesale establishments, not counting administrative offices and auxiliary units, under a single ownership. Ownerships are grouped into the following nine size classifications:

- 1 wholesale establishment only
- 2 wholesale establishments
- 3 to 5 wholesale establishments
- 6 to 9 wholesale establishments
- 10 to 14 wholesale establishments
- 15 to 24 wholesale establishments
- 25 to 49 wholesale establishments
- 50 to 99 wholesale establishments
- 100 or more wholesale establishments

Legal form of organization

In tables 5A and 5B wholesale establishments are classified into the following legal forms of organization:

Individual proprietorships.--Unincorporated businesses owned by one individual or person who may or may not actively participate in its operations.

Partnerships.--Unincorporated businesses owned by two or more persons, having a financial interest in and a responsibility for the business. Each partner may or may not actively participate in the operation of the business.

Corporations.--Businesses owned by legally incorporated organizations or companies. Cooperative associations incorporated under either regular corporation laws or under the special association laws are included in this legal form.

Other legal forms.--Establishments having ownerships under legal forms not defined above. Included here are all establishments owned or operated by cooperative associations not incorporated under the regular corporation laws or under special cooperative association laws, and other miscellaneous ownership types such as receiverships, estates, etc.

Period established or acquired

Each respondent was requested to report the date the 1948 owner acquired or started the business within the city. The date reported reflected the last change in ownership, if any, prior to December 31, 1948. Mere change of name without a change of the actual owners was not considered a change of ownership. Neither was a change of location of the establishment within the city considered a new business if it continued at the new location under the same ownership.

Table 8C presents data for wholesale establishments classified by date of establishment or acquisition. Establishments are grouped for presentation purposes as follows:

Acquired or established:		
1948		1930 to 1933
1946 or 1947		1920 to 1929
1942 to 1945		1900 to 1919
1938 to 1941		Prior to 1900
1934 to 1937		Year not reported

Sales terms

Sales, entire year.--Sales include receipts from merchandise sold during 1948 together with any receipts from repairs or other services to customers, after deducting returns and allowances and trade discounts. Sales of merchandise for others on a commission basis are included as well as sales for the account of the reporting establishment. Local and State sales taxes or Federal excise taxes collected by the wholesale establishment directly from customers and paid directly to local, State, or Federal taxing agencies are included. Gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer or supplier

and passed along to the wholesale establishment are also included in the sales figures.

Sales figures, therefore, represent total sales and receipts of all establishments primarily engaged in wholesale trade. They do not include sales by manufacturing plants, general administrative offices of manufacturers, retailers, and other businesses whose primary activity is other than wholesale trade.

Some establishments included in Wholesale Trade (such as buying brokers, purchasing agents, syndicate buyers, country grain elevators, and cream stations) are engaged chiefly in buying from the trade or public for clients or for parent organizations, selling being incidental or non-existent. These establishments reported purchases in lieu of sales. Sales as shown for agents and brokers represent the selling value of the goods in the transactions negotiated.

Sales by class of customer:

Sales to retailers--Represents sales to all classes of retailers including chains, mail order houses, department stores, independent stores, restaurants, and other establishments included in Retail Trade.

Sales to industrial users--Represents sales to industrial, commercial, professional, institutional, and other similar end users. They represent goods bought for business use such as machinery, equipment, supplies, raw materials, components, etc., rather than goods bought for resale in the same form as purchased.

Sales to wholesale organizations--Represents the volume of business done by one type of wholesale establishment with another, thus providing a measure of the volume of duplication in wholesale sales.

Sales to household consumers--Included here are sales to household consumers, individual users, and to farmers. This inquiry measures the volume of retail sales by wholesale establishments.

Sales for export--Represents the domestic value of goods exported by wholesale establishments, including sales through their agents in this country. Wholesale organizations maintaining foreign branches were requested to include here the value of goods shipped to such branches.

Sales size--In tables 2A and 2B, service wholesalers and manufacturers' sales branches (with stocks) are classified by size of establishment based upon 1948 sales. Establishments starting in business in 1948 are included on the same basis as other establishments, even though they may not have been in operation the full twelve months. In table 2A, United States Summary, nine sales-size groups were used as follows:

\$5,000,000 and over	\$300,000 to \$499,999
\$2,000,000 to \$4,999,999	\$200,000 to \$299,999
\$1,000,000 to \$1,999,999	\$100,000 to \$199,999
\$500,000 to \$999,999	\$50,000 to \$99,999
Under \$50,000	

In table 2B, geographic division and standard metropolitan area data are presented by five sales-size groups as follows:

\$5,000,000 and over	\$500,000 to \$999,999
\$1,000,000 to \$4,999,999	\$200,000 to \$499,999
Under \$200,000	

In table 3C, credit data for merchant wholesalers are analyzed by size of establishment, using four sales-size-classifications as follows:

\$1,000,000 and over	\$200,000 to \$499,999
\$500,000 to \$999,999	Under \$200,000

Stocks on hand

Stocks are defined as the inventory, at cost value, of merchandise on hand for sale as of the end of 1948. Goods owned and out-on-consignment are included but not the value of merchandise of others held for sale on consignment.

Storage capacity--petroleum bulk stations and terminals

Represents capacity in gallons of stationary facilities for bulk storage of gasoline and distillate and residual fuel oils. Includes all such capacity at bulk stations, distributing terminals and relay (or lockup) points. Data represent capacity assigned to each of the specified products as of December 31, 1948.

Truck terms

Trucks and truck-tractors--Trucks are distinguished from truck-tractors in that the pay-load is hauled on the truck whereas, in the case of the truck-tractor, it is towed in a semitrailer.

Trailers and semitrailers--A semitrailer is distinguished from a trailer in that the former is a two-wheeled vehicle which connects with a truck-tractor by means of a fifth wheel arrangement which transmits a portion of the weight on the towing vehicle. A trailer is a towed vehicle which carries the entire load on its own axles.

Manufacturers' rated capacity--This is the rating assigned by truck manufacturers. It should be noted that there is no exact relationship between such rated capacity and the actual load-carrying capacity. For example, trucks rated 1-1/2 tons can and do frequently carry loads of several tons. However, classification by manufacturers' rated capacity was used in the 1948 Census of Business since it was the only uniform basis for size indication available at that time. In spite of its limitations in indicating pay-load capacity, manufacturers' rated capacity does make it possible to evaluate the usage of light trucks, medium trucks, and heavy trucks in a given kind of business, and also between different kinds of business.

Form approved Budget Bureau No. 41-4844.

Form approved Budget Bureau No. 41-4844.

UNITED STATES DEPARTMENT OF COMMERCE

BUREAU OF THE CENSUS

WASHINGTON

CENSUS OF BUSINESS: 1948

Instructions:—Multiunit organizations engaged primarily in activities within the scope of the Census of Business should use Form BC-10 in reporting certain activities not covered on other Census of Business reports. For such organizations a separate Form BC-10 should be used for reporting activities of each administrative, district, executive, or general office, and for each warehouse having administrative and/or buying functions ("chain store warehouses"). The form also should be used in reporting activities of certain auxiliary units, such as buying offices, garages, receiving or shipping offices, and storage warehouses where such units have not been included on other Census of Business reports.

Units of your organization primarily engaged in activities outside the scope of the Census of Business, such as manufacturing, or in servicing such out-of-scope activities, should not be reported on this or other Census of Business reports.

The Census of Business covers operations for the full year 1948.
